

Estrategias de Especialización Inteligente

El papel estrategico de la Gobernanza

5 Mayo 2021

Javier GOMEZ PRIETO, Eng, PhD

European Commission, JRC

The Joint Research Centre

As the science and knowledge service
of the Commission our mission is to support
EU policies with independent evidence
throughout the whole policy cycle

Headquarters in Brussels and research facilities located in **5 Member States:**

Belgium (Geel), Germany (Karlsruhe), Italy (Ispra), The Netherlands (Petten) and Spain (Seville)

Smart Specialisation, methodological reminder

Key steps:

- 1. Analysis of regional context/potential
- 2. Governance
- 3. Vision for the future: EDP
- 4. Selection of priorities
- Policy mix
- 6. Monitoring and evaluation

Smart Specialisation, Andalusia (ES)

ESTRATEGIA DE INNOVACIÓN DE ANDALUCÍA 2020

RIS3 ANDALUCÍA

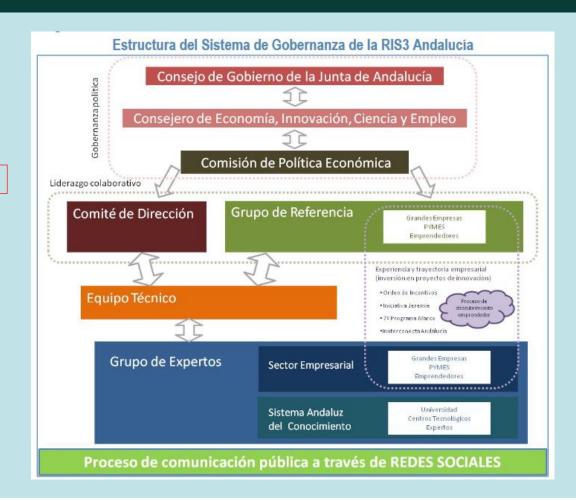

Andalusia

(ES)

- Concepto y contexto
- 2 Gobernanza del proceso de definición de la RIS3
- 3 Análisis del Sistema de Innovación
- 4 Descubrimiento Emprendedor
- 5 Visión de Andalucía 2020
- 6 Retos y objetivos finales
- 7 Prioridades de especialización
- 8 Políticas para el desarrollo de la estrategia
- 9 Marco financiero
- 10 Seguimiento y evaluación

Analysing the evidence in key topics in the implementation of Smart Specialisation

1

EDP

 The Entrepreneurial Discovery Process guides public and private investment to the areas with potential meet the social and economic development goals of the territory

Governance

 When it comes to the sensitive moment of deciding on strategic priorities, a truly inclusive RIS3 governance structure should be able to prevent capture by specific interest groups, powerful lobbies, or major regional stakeholders.

Monitoring Evaluation

- Monitoring as: a system to gather and process information, a transparent crystallisation of the logic of intervention and a communication device
- Evaluation as: a way to reinforce our credibility, a communication device and provide confidence in the process.

Governance, assessment in EU regions

JRC SCIENCE FOR POLICY REPORT

Assessing Smart Specialisation:

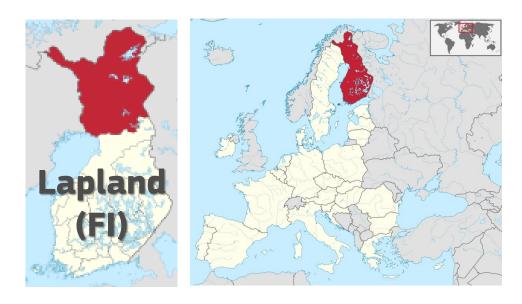

- Strengthened networks of actors and made the decision-making process more inclusive.
- The institutional changes have contributed to the production of a wide range of tangible and intangible collective goods.
- The effectiveness of horizontal and vertical coordination is still low.

Guzzo and Gianelle (2021) "Assessing Smart Specialisation: Governance"

Example: Lapland, Finland

The governance model emphasizes:

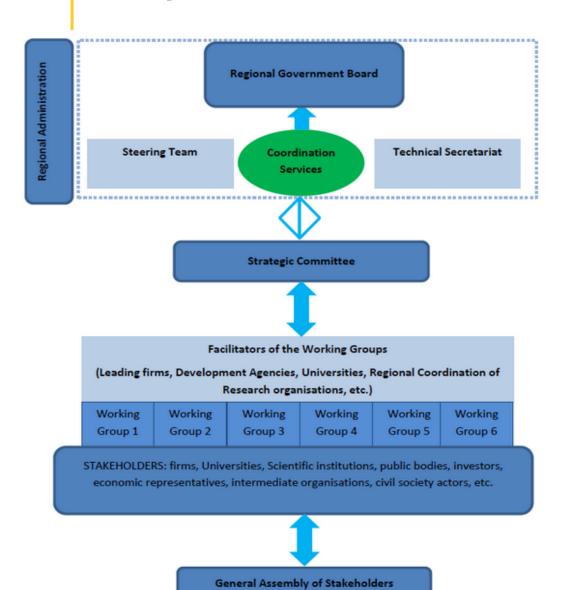

- The importance of a bottom-up approach by actively involving all the 21 municipalities of Lapland, as well as industry, educational institutions, development agencies, and research organisations.
- It also promotes a partnership between the regional and national level as the Regional Council takes a strategic lead, but in collaboration with other regional stakeholders and national level governmental institutions.

https://s3platform.jrc.ec.europa.eu/good-governance

Example: Friuli Venezia Giulia, Italy

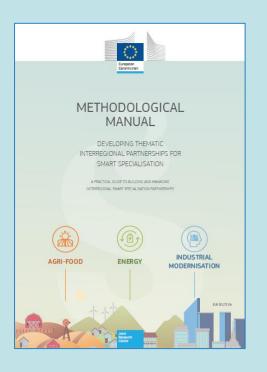

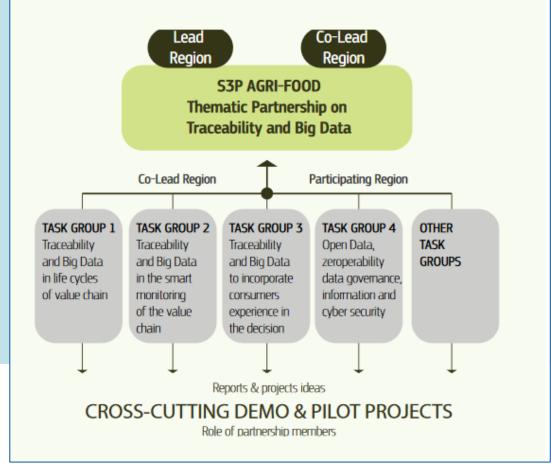

In order to achieve a better coordination of funds, transparency of processes, communication and evaluation, the S3 governance structure elaborated in Friuli Venezia Giulia (IT) clearly defines the roles and functions of the different bodies involved

Governance, assessment in EU regions

Challenges

To highlight the need to **bring into the process funding organisations and civil sociey** to build a shared understanding of potentially fundable projects.

Opportunities

Some countries have useful **experiences and evidence on the engagement of the private sector** in innovation policy, thereby representing an opportunity to keep improving and reflecting on the best ways to co-create governance.
